- Free-standing Input/Output Conveyor
- 3430-2572 Baler
- Auto-tie Baler
- One year parts and labor warranty with new Allegheny Strip Cut Shredder
- Allegheny SelecShred™ Screen

Why Allegheny is the Industry Leader

Industrial Shredders come in all shapes and sizes. Why are Allegheny shredders considered the best in the world? Over 50 years ago, Allegheny founder John Wagner began breaking the barrier, building an industrial shredder to out-perform a powerful 7.5 horsepower shredder already on the market. In 1971, he went one step further and introduced the first heavy duty industrial shredder in the industry – a 15 horsepower beast!

This trend continued into the present day, as Allegheny now manufactures 300 HP industrial shredders and shredding systems that can produce 20 tons of shredded paper per hour.

ALLEGHENY SINGLE SHAFT SECURITY GRINDERS

Destroy paper, plastic, etc. to any shred size you need

The Allegheny SelecShred™

In 2005, Allegheny introduced the shredding industry's first single-shaft grinder with an adjustable screen. The Allegheny SelecShred™ represents a major development in the document destruction industry, giving operators the ability to service a wider variety of customers faster with just a single piece of equipment. Instead of manually removing one screen and replacing it with a different-sized one to meet varying customer requirements, operators can now change the screen size of their grinder with just a simple push of a button!

Allegheny 1436GX Grinder

- Cutting Assembly:** 36" W x 24" L
- Horsepower Options:** 50 Hp.
- Voltage:** 208V, 230V, or 460V, 3 phase, 60 cycle
